

Nectiv and Nectiv Forte

DESCRIPTION:

Inactivated, water-in-oil emulsion, vaccines for the immunisation of primed fowls against Newcastle Disease Virus.

COMPOSITION:

Each bottle contains inactivated Newcastle Disease virus, V.H. strain, of chicken embryo origin. The vaccines contain the following concentration of virus:

- Nectiv: Every 0,5 ml dose contains $10^{8.4}$ EID₅₀ virus particles
- Nectiv Forte: Every 0,1 ml dose contains $10^{8.1}$ EID₅₀ virus particles

DIRECTIONS FOR USE: Use only as directed.

Nectiv:

- Nectiv can be used in all ages, from day old chicks (together with a suitable live Newcastle Disease Vaccine), to primed point of lay breeders and layer birds.
- Nectiv vaccine may be administered by subcutaneous injection into the base of the neck in fowls of all ages or by intramuscular injection in the breast or thigh muscle in fowls older than 7 days.

Nectiv Forte:

- Nectiv Forte vaccine is intended for the immunisation of day old chicks and chickens up to the age of 3 weeks (together with a suitable live Newcastle Disease vaccine) against Newcastle disease.
- Nectiv Forte vaccine may be administered by subcutaneous injection into the base of the neck up to age of 7 to 10 days or by intramuscular injection in the breast or thigh muscle in fowls older than 10 days.

Consult a veterinarian on the best vaccination programme for your circumstances.

Allow the vaccine to gradually reach room temperature before commencing with vaccination. Shake the bottle well before and during use and remove the aluminium overseal from the bottle.

RECOMMENDED DOSAGE:

Inject all fowls in the flock:

Nectiv:

Inject 0,2 ml per day old chick and 0,5 ml per older fowl.

Nectiv Forte:

Inject 0,1 ml per day old chick and 0,2 ml per chicken older than one day up to the age of 3 weeks.

PRECAUTIONS:

See package insert.

WARNINGS:

See package insert.

STORAGE:

Store between 2 °C and 8 °C. Protect from light. **Do not freeze.** Use within expiry date.
